EDUCATION

University of Georgia, School of Computing
Bachelor of Computer Science

Athens, GA

June 2023 – Aug 2026

Relevant Coursework: Data Structures, Algorithms, SWE, Full-Stack Development, OOP,
Data Science/ML, GenAI, Deep Learning, Computer Architecture, Computer Graphics, Systems Programming

SKILLS

- **Languages:** Java, JavaScript/TypeScript, Python, C/C++, SQL (PostgreSQL), GDScript, Matlab, Bash.
- **Tools & Technologies:** React/Next.js, Spring Boot, Node.js, MongoDB, Redis, Docker, Git, Unix/Linux, Postman, REST, Vercel AI SDK, RAG, NumPy/Pandas/PyTorch, Google Colab, Figma, Motion, Jira, Scrum.

RELEVANT EXPERIENCE

Freelance Web Developer (“Holywatr” Website) | [\[Site\]](#) | *Full-Stack* Nov 2025 – Present

- Developed a multipage brand platform for a metal band with **659.5K monthly listeners** using JS/CSS.
- Integrated **Shopify API** via **GraphQL** queries to sync merchandise inventory and streamline user transactions.
- Engineered a "digital-horror" **responsive UI/UX** using **GLSL shaders** to match client brand identity.
- **Optimized SEO** via Open Graph tags, Sitemap.xml, and Robots.txt to ensure search engine crawlability.

UGA ACM (Association for Computing Machinery) | *Executive Officer & CSIP Co-Chair* May 2025 – Present

- **Co-host professional networking events** for **300+ members**, coordinating with guest speakers from **Google**, **AWS**, and faculty research teams to improve club-wide industry exposure.
- **Leading weekly technical workshops** on DSA and behavioral skills for 10+ students and directed Figma UI/UX redesigns to modernize club branding and recruitment materials.

PROJECT EXPERIENCE

ACM Movies (Cinema E-Booking System) | [\[Site\]](#) | *Scrum Master & Full-Stack & UI/UX* Aug 2025 – Present

- Architected a **Spring Boot** backend (**PostgreSQL/JPA**) containerized via **Docker** and deployed to **Render**, with **80+ REST endpoints** and 15 JPA entities (models).
- Optimized API performance using **DTOs**, **pagination**, and **caching** to reduce payload sizes by **30–45%**.
- Developed client-side **API Facade** to decouple frontend components from backend complexity, ensuring maintainable and scalable code architecture.
- **Led 5-person Scrum team** via Jira, improving sprint velocity by **~10%** while adhering to **SOLID** principles.
- Implemented **RBAC** via JWT/Spring Security, securing sensitive user data via **BCrypt** and **AES encryption**.

RAG-AI Portfolio (Passion Project) | [\[Site\]](#) | *Full-Stack / Artist* Jun 2025 – Present

- Built a **RAG chatbot** using **Gemini 2.5 Flash** and **Upstash Redis** for edge-runtime semantic search, grounding responses in portfolio-specific data.
- **Managed AI infrastructure costs** via IP-based **rate limiting**, query **embedding caching**, and **SHA-256 hashing** to prevent redundant API calls.
- Designed an **interactive interface** using **Framer Motion**, hand-drawn pixel art animations, and smooth parallax motion via linear interpolation.

CourseHub (“Best Class Project”) | [\[Site\]](#) | *Team Lead & Full-Stack & UI* Mar 2025 – May 2025

- Integrated **Gemini API** and **YouTube Data API** to automate study plan generation, reducing manual content creation by **~90%**.
- Engineered **15+ REST endpoints** and **MongoDB** schemas for community resource sharing, enforcing **NextAuth.js** (JWT) authentication.
- **Led 4-person Agile team** via Kanban, managing workload and team chemistry to deliver stretch goals.

ADDITIONAL EXPERIENCE

Tower Ascent (UGA Game Builders) | [\[Play\]](#) | *Frontend & Backend Programmer / Artist* Sep 2025 – Present

- **Engineered modular systems** for trading, inventory management, and animated UI in **Godot/GDScript**.
